Education

Jagannath Institute of Management Sciences
Bachelor of Computer Applications

Vasant Kunj, New Delhi
batch 2022-2025

Experience

Full Stack Developer Trainee | Team Elogisol | Delhi

Feb 2026 – Aug 2026

- Engineered React/Next.js applications with reusable components, dynamic forms, dashboards, data tables, client-side state, and REST API integrations.
- Produced 10+ responsive UI modules using React.js, Next.js, and Recoil, improving consistency across application screens.
- Implemented CRM workflows covering record creation and management, status-based operations, user-driven data updates, filtering/search interfaces, and API-backed dashboards.
- Designed relational database models with entity relationships and SQL queries, integrating persistence logic across backend services and application workflows.
- Performed end-to-end testing and debugging across UI, API, backend, and database layers, resolving functional defects before production releases.

Full Stack Developer Intern | Pixler IT Solution Pvt Ltd | Gurugram

June 2025 – Dec 2025

- Developed and deployed Full-Stack features: Built responsive user interfaces using React.js and created robust RESTful APIs with Node.js and Express.js, improving application performance and user engagement.
- Optimized database management : Designed and managed scalable MongoDB schemas, writing efficient aggregation pipelines that reduced query latency and ensured seamless data storage
- Integrated core functionalities : Implemented secure user authentication JWT/OAuth), state management (Recoil/Context API), and third-party services, streamlining workflow efficiency and code reliability.
- Leveraged AI-assisted development tools (GitHub Copilot / Cursor) to accelerate boilerplate coding, wrote unit tests.

Technical Skills

- Languages** : JavaScript (ES6+), TypeScript, C++, Python, HTML5, CSS3, Java.
- Frontend** : React.js, Next.js, EJS, Tailwind CSS, Framer Motion, Recoil, Zod.
- Backend** : Node.js, Express.js, NestJS, Hono (Serverless), REST APIs, WebSockets, Payment gateway (Stripe).
- Database & Caching** : PostgreSQL, MongoDB, Prisma ORM, Redis, Cloudflare KV
- Cloud & DevOps** : AWS (EC2, S3, CloudFront), Nginx, Docker, TurboRepo, Git, Vercel, Cloudflare Workers.
- Testing & Tools** : Jest, Figma, PowerShell, WSL.
- AI** : LLM Integration, RAG, Vector Databases.
- Core Concepts** : Data Structures & Algorithms, OOPs.

Personal Projects

DocPilot - AI-Powered Document Intelligence | React.js, Node.js, LangChain, Pinecone, OpenAI API

Mar 2026

- Built a RAG pipeline with LangChain and Pinecone for context-aware Q&A over large PDF documents.
- Added Pinecone vector database for accurate semantic retrieval and zero LLM hallucinations.
- Optimized document chunking and semantic retrieval, eventually reduce LLM API token usage.

Cipher Chat – Secure Multi-Room Messaging Platform | React, TypeScript, Node.js, AES Encryption

Dec 2025

- Built a client-side AES end-to-end encrypted messaging platform with a zero-knowledge architecture and RAM-only server state.
- Architected a partitioned WebSocket backend to support dynamic room creation while maintaining a strict No-Log Ephemeral state (RAM-only).
- Links:** [Live](#) | [GitHub](#)

Zap-Wallet – Digital Wallet Application | MongoDB, Express.js, React, Node.js, Zod

Oct 2025

- Built a digital wallet with atomic database transactions for consistent concurrent fund transfers.
- Implemented JWT authentication, Zod validation, and secure transaction workflows with a responsive React/Tailwind interface.
- Links:** [Live](#) | [GitHub](#)

Achievements

- Earned **Certificate of Excellence in Java DSA** (Coding Ninjas) and solved **150+ problems on Leetcode**.
- Successfully managed production deployments for freelance clients and personal projects (Edge functions).**
